Dharun P

Jain University | B.Tech CSE-AIML | 2023–2027

dharunperiyasamy2005@gmail.com | | Bangalore | LinkedIn | GitHub

Summary

Computer Science (AI & ML) undergraduate with strong coding skills in Python and Java, a solid foundation in object-oriented programming and data structures & algorithms, and experience building REST APIs and database-driven applications. Applied prompt engineering with the OpenAI API to build AI-assisted features in a personal project. Analytical, detail-oriented, and comfortable working independently to break down and solve technical problems, with growing interest in software testing, automation, and AI-driven development tooling.

Education

Jain University Bangalore
B.Tech Computer Science and Engineering (AI & ML), *Present*

Skills

Programming Languages: Python, Java, SQL
Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems,
Cloud Platforms: Amazon AWS, Microsoft Azure, GCP
AI Tools: OpenAI API, Prompt Engineering
Databases: MySQL, Oracle PL/SQL
Tools: Git, GitHub, VS Code

Projects

BudgetLens – A Scenario-Based Financial Projection Model

- Built a scenario-based financial model in **Google Sheets** projecting expenses and savings under different assumptions.
- Designed a summary dashboard tab to present projections clearly for quick, at-a-glance decision-making.
- Used formulas and linked sheets to run sensitivity analysis on key variables like spending rate and income growth.

Adaptive Smart Keyboard with AI Interaction

- Designed and implemented **5+ REST APIs** with analytics tracking to evaluate feature adoption and user behavior data.
- Focused on improving real-time response accuracy and reducing latency in text suggestions, enhancing the overall user experience.

RetailScope – A Sales Trend & Store Performance Analyzer

- Analyzed a multi-store retail sales dataset using **Python (Pandas)** and **SQL** to identify underperforming stores and seasonal demand patterns.
- Built visualizations to highlight key trends and presented data-backed observations on factors affecting store-level sales.
- Summarized findings into a concise set of actionable recommendations for improving store-level performance.

Professional Experience

Database Intern 06/2025 – 07/2025
Tamil Nadu Newsprint and Papers Limited (TNPL), Karur *Intern*

- Developed and optimized **Oracle PL/SQL** scripts for backend database operations, supporting ERP system functionality and improving query efficiency.
- Troubleshot database and user-reported issues while maintaining technical documentation to enhance system reliability and support.

Courses

Java Programming, *E&ICT Academy, IIT Kanpur*
Generative AI in Education, *University of Glasgow*
Artificial Intelligence Masterclass + ChatGPT
Dynamic Programming, Greedy Algorithms, *University of Colorado Boulder*
